Di Bogor

Dengan Hormat,

Puji dan syukur kita panjatkan kehadirat Tuhan Yang Maha Esa yang senantiasa melimpahkan rahmat dan hidayah-Nya kepada kita semua. Semoga kita selalu berada dalam lindungannya.

Sehubungan dengan diadakannya kegiatan **I-Talks** oleh **Himpunan Mahasiswa Ilmu Komputer** Institut Pertanian Bogor pada:

waktu : 31 Agustus 2024
tempat : Auditorium FMIPA IPB

Maka kami bermaksud mengajukan permohonan bantuan pencairan dana kemahasiswaan sebesar **Rp. 1.123.000,-** guna kelancaran kegiatan tersebut. Adapun rincian penggunaan dana adalah seperti yang tertera pada lampiran proposal.

Demikian surat permohonan dana ini kami sampaikan. Atas perhatian dan kerjasama Bapak, kami mengucapkan terima kasih.

Menyetujui,
**Ketua Umum
KP KM IPB**

- Responsible for developing, deploying, and maintaining frontend and backend applications. Also responsible for creating the software development ecosystem in the company.
- Building scalable REST API for LMS and main website with Python FastAPI, PHP Laravel.
- Building frontend for company main website and LMS with Vue JS and NextJS.
- Creating deployment pipeline with Github Action and maintaining multiple servers with Amazon Web Service (AWS).

CLOUD COMPUTING DISTINCTION GRADUATE

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka - Apprenticeship

FEB 2022 - JUL 2022

- I'm in the top 10% of all graduates (distinction graduate).
- Learned about creating, managing, and maintaining cloud computing services using Google Cloud Platform (GCP), which includes choosing, using, and designing cloud architecture with GCP to build a real application.
- Building backend services for machine learning based android application which includes building REST API with FastAPI Python, designing databases, and managing cloud based server to deploy the API and ML application.

BACKEND DEVELOPER

PT. Bank Negara Indonesia - Internship

JUNE 2021 - DEC 2021

- Using technology such as PHP, Mysql, and Javascript, I successfully created a project management tools web application.
- Responsible for designing, building, and maintaining the server-side of web applications.
- Building and maintaining REST API and creating and optimizing queries to the database.

EDUCATION

IPB UNIVERSITY

Bachelor of Computer Science

AUG 2019 - JUL 2023

Bogor, Indonesia

- Best graduate at my Major
- 3.89 / 4.00 GPA

SMA NEGERI 1 PURWOKERTO

High School Diploma, Natural Sciences

JUN 2016 - JUN 2019

Purwokerto, Indonesia

- 35.65 / 40.00 National exam score

AWARDS

Finalist of CTF Competition
Compfest 13

OCT 2021

- Compfest 13 is a competition held by Indonesia University (UI). It is a national level competition. I compete with various universities from all over Indonesia. CTF is a cyber security competition. I was tasked to retrieve a secret key from a website or application. To retrieve this secret key, I need to find the vulnerability and break into the website or application.

Best Narrative Game

Arkav 7.0 Game Jam

- Arkav 7.0 is a National level competition held by Institut Teknologi Bandung (ITB). I was given 48 hours to create a fully playable game. My team won by being the best narrative game.

FEB 2021

PROJECTS

Monthly Reconcile (Backend Feature) - Backend

Tokopedia

- Creating a feature to send automatic monthly orders reconcile to partners once a month.
- Saving around 40+ hours of finance team time each month before to manually send the reconcile.
- Creating a robust feature with Golang and using Google and Lark API to send the report to the client.

AUG 2023 - DEC 2023

Emodairy (Android Application) - Backend

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

MAY 2022 - JUN 2022

- Working as a team to create an android application which implements machine learning as a core feature.
- Responsible for designing, creating, and maintaining the database.
- Designing, creating, documenting, testing, and maintaining REST API.
- Managing and creating deployment for REST API and ML application using Google Cloud Platform (GCP)
- Creating CI-CD pipeline using github action to test, format, and deploy the code to the cloud every time there is a change in master branch.

ORGANIZATIONS

Student Association of Computer Science (Himalkom)

DEC 2020 - DEC 2021

Staff at Human Resource Department

- Developing skills of computer science students, especially soft skills through creating various project events.
- Holding and managed events for educating and improving the soft skill of IPB University computer science students.

International Association of students in Agricultural and related Sciences (IAAS)

OCT 2019 - NOV 2020

Staff of Science and Technology Department

- Working on essay writing on various topics and creating infographic content and working on various projects regarding the environment and helping the local community.

CERTIFICATES

- Associate Cloud Engineer ([Google Cloud](#))
- Architecting with Google Compute Engine Specialization ([Coursera](#))
- Elastic Google Cloud Infrastructure: Scaling and Automation ([Coursera](#))
- Essential Google Cloud Infrastructure: Core Services ([Coursera](#))
- Essential Google Cloud Infrastructure: Foundation ([Coursera](#))

PERSONAL PROFILE

Hello I'm Wildan, fresh graduate from Bogor Agricultural University's Computer Science Major. I enjoy developing software or solutions to automate repetitive chores or challenges, overcoming new challenge and learn new things to improve my hard and soft skills. I have a lot of expertise creating programs and application then incorporating machine learning into them using languages like Kotlin, Dart, Python, JS, PHP, C++ and R. In order to come up with the best answer to the issue, I also knowledgeable with UI/UX design principles. Another hobby that I love is drawing illustrations.

KEY COMPETENCIES

Software engineering	Android development	Communication
Data structure and algorithms	GIT version control system	Critical thinking
Object-oriented programming	Testing and debugging	Creative problem-solving

PROFESSIONAL EXPERIENCE

Nomura Research Institute Frontend Engineer	May 2024 - Now
• Retail product deep analysis system powered with AI & Realtime data integration (React + Tailwind). • Maintaining Noya mobile application for internal employee needs & management using Flutter. • Online assessment/recruitment system (DevSkiller like) using React with automatic scoring system for candidate project analysis (React, Flutter, Kotlin, NodeJS) and create a pixel perfect automated test scoring system	
KU-CI Internasional Flutter Mobile Developer	April 2023 - May 2024
• Implementing UI/UX Design into Reactive and Responsive Apps. • Communicate with backend server via REST API endpoint and Websocket. • Implementing custom widget animation from scratch. • Account & Token Based Authorization, SQLite, Geolocation, Realtime Chat/Call, Secure Chat E2EE System and Payment Gateway feature implementations. • BLoC and Provider state management for reactive apps. • Apply clean architecture code, dependency inversion principle, and single source of truth data flow. • Git versioning control system. • Apps testing, debugging and performance tuning, resource monitoring and CI/CD.	
Aido Health (Siloam Group) Fullstack Website Developer	September 2023 - December 2023
• ERD and Database Schema Design. • Laravel Framework. • Create responsive layout for multiple device . • MVC software design pattern. • Monolithic architecture code base. • Implement Account & Token Authorization, Dashboard, and Content Management System from scratch. • Git versioning control system. • Security Enhancement with JWT.
