Feedback

Kurang adanya connectivity antara problem yang didapatkan dengan solusi yang ada, sehingga diragukan proses analisisnya dan terkesan jump to solution

Ide gamifikasinya sudah dipikirkan dengan matang namun sepertinya belum benar-benar solving core issuenya. Saat presentasi menjelaskan isi materi terburu-buru karena slidenya banyak teks jadi kurang maksimal

Feedback

I don't think the proposed solution matches the root problem that they identified. Their research part is quite solid, and the problem statements are also quite deep, but they could've done better in solutioning phase. The current solution might cause many privacy and social issues, and relies too heavily on end users.
